TEKTAGOGY GROUP

Transforming Learning Through Technology

EDUCATIONAL TECHNOLOGY • DIGITAL LEARNING • LMS CONSULTANCY

Company Profile

TEKTAGOGY Group is an educational technology consultancy focused on helping institutions and educators make meaningful use of digital learning. We bring together learning technology, practical implementation support and learner-centred course design to help organisations build more effective online and blended learning experiences.

Who We Work With

Universities, colleges, TVET institutions, training organisations, education-focused NGOs and individual educators seeking practical support with learning management systems, digital course development and staff capability building.

Our Purpose

Our mission: To help education providers use technology purposefully to improve the design, delivery and support of learning.
Our approach: Practical, collaborative and guided by learning needs—not technology for its own sake.

LEARNING DESIGN	LEARNING TECHNOLOGY	CAPABILITY BUILDING
Structure engaging digital courses, learning activities and assessments.	Support LMS planning, setup, administration and improvement.	Equip educators and teams to use digital learning tools confidently.

Our Services

We offer project-based consultancy, practical implementation support, training and ongoing LMS assistance.

LMS Consultancy & Implementation

$650–$1,200 per project

LMS needs assessment; Moodle configuration guidance; course categories and structure; up to five course shells; user roles and access setup; basic lecturer orientation.

Instructional Design & Course Development

$450–$900 per course

Learning objectives and course mapping; digital course structure; learning activities; quizzes and assessments; Moodle course organisation; one agreed revision round.

LMS Administration & Support

$400–$850 per month

Course and user administration; enrolment and access support; lecturer and student assistance; basic troubleshooting; activity monitoring; monthly service report.

Digital Learning & LMS Training

$350–$600 per remote session

Remote half-day or full-day training for up to 20 participants; LMS fundamentals; online course creation; learning materials; quizzes and assignments; engagement practices.

Digital Learning Strategy & Consultancy

$900–$1,800 per project

Digital learning needs assessment; LMS readiness review; teaching-practice review; implementation roadmap; staff development recommendations; findings report and presentation.

Individual Educator & Department Support

$75–$150 per consultation or task

LMS consultation; course organisation; assessment setup; digital teaching guidance; and platform troubleshooting.

How We Work

1. Discover — clarify institutional goals, learners, platforms and current challenges.
2. Design — agree the scope, deliverables, timeline and success measures.
3. Deliver — provide the agreed consultancy, course design, configuration guidance or training.
4. Review — gather feedback, make agreed revisions and document next steps.

Pricing & Engagement

Prices are indicative USD ranges for initial planning. Final fees depend on scope, complexity, participant numbers, integrations and delivery requirements. Hosting, infrastructure, paid plugins, extensive original content writing, video production, SCORM development and complex integrations are scoped separately where required. Small projects may use a 50% commencement payment and 50% on completion; larger projects may be billed by milestones. Monthly support is invoiced monthly. Quotations are valid for 30 days unless stated otherwise.

Professional Foundation

TEKTAGOGY Group is informed by more than 15 years of practical ICT experience in a university environment, including user support, digital learning assistance, LMS-related support and training for academic and administrative users. This experience provides a practical understanding of the day-to-day needs of educators, learners and institutional support teams.

The consultancy is led by an ICT professional with a Bachelor of Science in Information Technology and ongoing postgraduate study in ICT Integration in Education and Instructional Design. The postgraduate qualification is in progress.

Why Work With Us

- A bridge between technology operations and teaching practice.
- Practical support for educators, learners and institutional teams.
- Solutions shaped around the institution's context and capacity.
- Clear scopes, agreed deliverables and collaborative delivery.
